Online Training Solutions

SeamsLMS

Simplifying Business Training | Maximising Business Performance

Our industry leading online training and learning management solutions allow you to organise your training content, scheduling, delivery and reporting into a simple, easy to use, affordable online environment.

To date, we have worked with over 9,000 clients in 11 countries, helping them to improve their business performance one step at a time. We combine over 20 years' experience with new age technology to help you cut costs, increase productivity, improve compliance and save time.

Our Solutions

- **Seams Cloud** – a simple, easy to use, affordable cloud-based Learning Management System.

- **Seams Dedicated** – a fully bespoke, branded Learning Management System for organisations with more complex needs.

- **Seams Online Learning** – industry standard, legislation-compliant online training modules which can be generic or fully bespoke to reflect the uniqueness of your organisation.

We will simplify your business training to maximise your business performance

![Seams Cloud]

Seams Cloud is the flagship product of Seams LMS, Ireland's most experienced professional online training and LMS Development Company. A centralised, cutting edge learning management system that allows you to organise your training schedules, delivery and records into one highly flexible, affordable and customisable online, cloud-based environment. Seams Cloud was built with simplicity at its core.

We will simplify your business training to maximise your business performance

Current Clients

Seams Cloud is adaptable, facilitating the needs of a wide range of organisations; from small SMEs to multinational organisations. We cater for organisations with both basic and complex administrative requirements including:
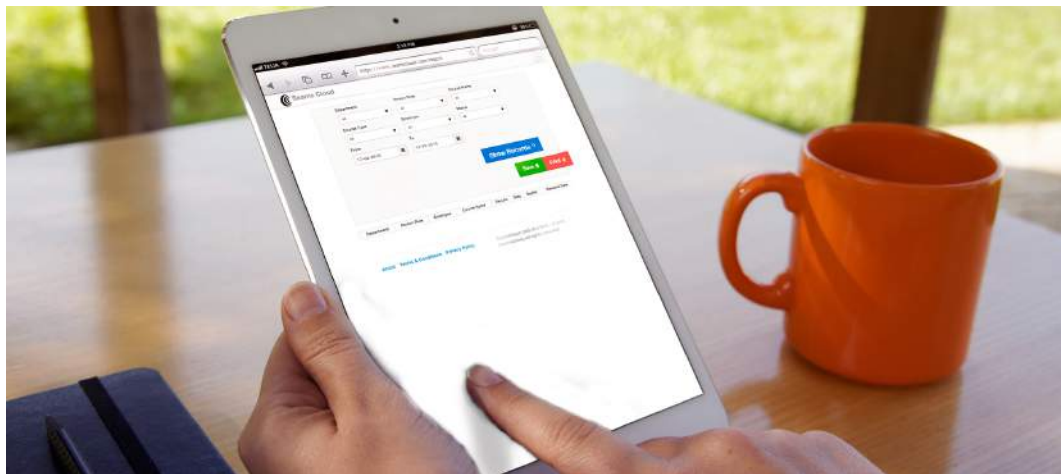

- Compliance-based training
- Multi-tier and location access controls
- Classroom and e-learning training
- Advanced filtered reporting
- Automated rolling enrollments
- All this with your own brand

Register www.seamscloud.com or email info@seamscloud.com

Benefits

Lower start up costs

No software or installation costs. You also won't need to devote the time or human resources to installing programs, working out glitches, or making sure that software is installed company-wide.

Improved accessibility

Seams Cloud offer better accessibility for both staff and managers. Staff can learn on-the-go; anywhere, anytime and from any device. Simply log into the LMS and complete training without limitations. Managers or trainers can utilise their tablets, mobile phones, and any other internet-ready device to upload content and communicate with staff.

Faster deployment

Seams have eliminated the burdens associated with the steep learning curve of a new system and getting ready for launch. Simply sign up at seamscloud.com and begin creating your content and courses.

Accessible 24/7 from any device

At least 10% increase in staff productivity

No software or installation costs

Reduce staff churn by 70%
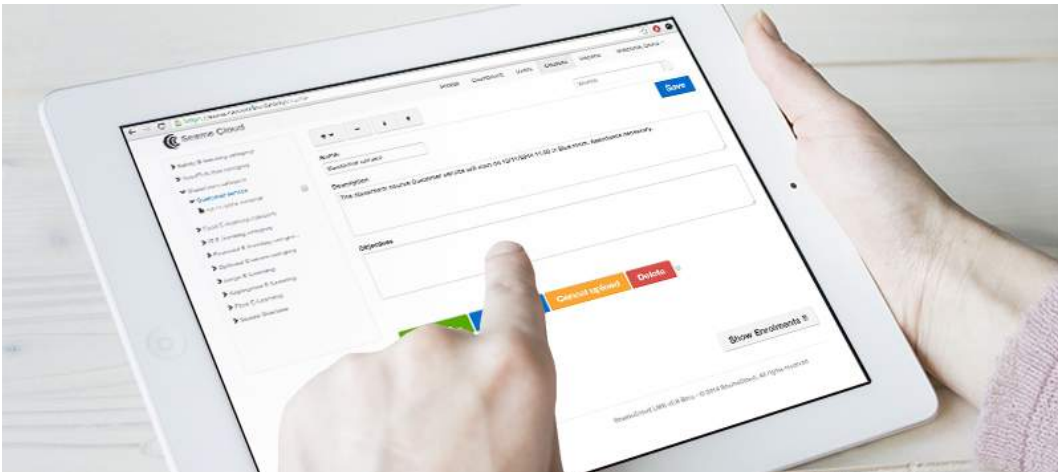

Cost predictability

No unexpected maintenance fees or support costs, so you can know exactly how much you need to allocate for your LMS.

Reduce staff turnover

Research shows that staff who leave a company in the first year of employment is four times more likely in a company offering poor / no training. Direct replacement costs can reach 50-60% of the staff salary; these costs are not noticed as they are not exactly budgeted for – UNLIKE training.

Smarter / more efficient staff

Training can yield at least 10% improvement in the productivity levels of the workforce. For example: An office accounts assistant who earns €10 / hour completes an e-learning advanced accounting course costing €100. They save 15 minutes a day with the newly learnt skills. Increased productivity pays for the course within two months. The 15 minutes / day yields a 200% ROI in 1 year.

Features

Intuitive, user-friendly interface
We've worked hard to develop a system that looks clean, uncluttered and is intuitive to navigate, regardless of how much training content you have installed, or whether you're using the system as an admin, a manager or a basic user. Set up and view Locations, Departments, Roles and Users in less than 60 seconds.

Instant deployment
Seams LMS is a software as a service platform (SaaS). Users can deploy their LMS from the Seams Cloud website in seconds.

Responsive design
Seams LMS is built using HTML 5. We knew our customers would need to access their training material, at any time, at multiple locations and on multiple device.

E-learning compliance
Supports industry standard software specifications for advanced e-learning content, for example SCORM and Tin Can API.

Save 50% on training delivery time

Accessible 24/7 – 365 days a year

Customisable branding
Display your own company logo, ensuring a consistent experience of your brand for users and a seamless integration of Seams Cloud into your existing training infrastructure.

Track performance
Training results are automatically recorded, and our system contains multiple data filter options and a custom data range to allow you to analyse training data whatever way suits you best.

Seamless data migration
Upload training content to Seams Cloud in just a couple of clicks. Our LMS will support almost any file-type or format you can name, and give immediate access to assigned users.

Multi-tier controlled access levels
Control access to the scheduling, enrollments, reports, depending on the individual's role in the system.
