# SuMi Trust

### Company Background:

SuMi Trust Global Asset Services are global leaders in fund accounting and fund financial reporting. They service a large number of hedge fund clients, anticipating their needs and emphasising pragmatic and cost effective solutions.

**50-70% -**  
The average saving made by choosing elearning over classroom based learning.

**€30** of productivity gained for every €1 spent on training.

### Challenge

A company the size of SuMi Trust, operating in a field as fast moving and complex as the financial services sector, has a long list of specific training requirements. The organisation has a large employee base, which in turn requires extensive ongoing training in a very fast-moving and often-changing landscape of legislative requirements. They required a secure learning management system with their own portal and branding, built to their own specifications.

They also required intuitive, easy-to-access and easy-to-use training content that could allow their employees to remain up-to-date in the fields of anti-money-laundering and data protection.

### Solution

With Seams Dedicated, we were able to deliver a bespoke learning management solution branded to SuMi. We supply and maintain the hosting, which offers the highest level of security without sacrificing 24/7, own portal accessibility for their staff. Seams Dedicated is a robust system, capable of handling the large volumes of users SuMi requires. It simplifies the administration of the training with automatic notification for their employees, and incorporates fast recording and reporting of training data to a level of detail unmatched by any other solutions.

Seams Dedicated therefore provides a bedrock for future training and planning that will keep SuMi Trust ahead of their competitors going forward. Our Seams Online Training Modules also allowed SuMi to provide the anti-money-laundering and data protection training they required in a simple, easy-to-use, off-the-shelf package. They simply had to upload the content to their Seams Dedicated learning management system and roll out the most up-to-date information to their staff in an intuitive, affordable package.
